

**DENVER MUSEUM OF NATURE AND SCIENCE
VENUS WINDS PROJECT
MEETING AGENDA**

Date/Time/Location 28 May 2015, 6:00 PM Exploration Studio 106

AGENDA ITEMS CARRIED FORWARD

Your experience with DS9 and Gimp All

Two software applications, **SAOImage DS9** and **Gimp**, have been proposed as suitable substitutions for analysis of Venus images. At the last meeting, Art discussed his experience using **DS9** which has been favorable so far. We need to see a demonstration of **Gimp's** capabilities to compare with **DS9**.

Wind Velocities to Date All

This is an opportunity to discuss your experience in completing velocity spreadsheets for July 12, 2004. Please emphasize the strengths and weaknesses of your evaluation. At a later meeting, Christy will do a statistical analysis of the results to date.

Car-pool experiment Art

Art will describe several alternatives available to analysts who lack transportation to our Thursday meetings.

NEW AGENDA ITEMS SINCE LAST MEETING

July 14, 2004 Wind Velocities Mark

Mark will discuss the consensus-derived starting points for the first image of the nine-image set. (Mark is in NYC for a NASA conference and will speak to us via WebX.)
