

**DENVER MUSEUM OF NATURE AND SCIENCE
VENUS WINDS PROJECT
MEETING AGENDA**

Date/Time/Location 6 Aug 2015, 6:00 PM Exploration Studio 102

AGENDA ITEMS CARRIED FORWARD

Wind velocities for other nights in the July 2004 data Mark

It appears that there are enough usable images in all 10 days to attempt tracking features at a one-day interval over that period. It is hoped that in some cases, the same feature might be tracked over a two-day interval. Discussion of this topic will continue at this meeting.

Wind velocities for July 12-13 2004 Mark

Mark will discuss the newest results from volunteers.

NEW AGENDA ITEMS SINCE LAST MEETING

Wind velocities for 10 nights in July 2004 Mark

Mark will distribute *rectangular* images for the nights of July 4-13, 2004. We will determine velocities for one pair. The assignment will be to determine velocities for the remaining nine pairs.
